TERRI SABELLA

Chief Executive Officer

Throughout 2019, the Tennessee Primary Care Association and community health centers across the state focused on the concept of resilience. We have envisioned "The Resilient Health Center" as one that maintains its focus on the health of individuals, families, and communities, all while meeting and overcoming the many challenges of today's health care environment.

We have listened to health center leaders, providers, and staff who are continually striving to make an even greater impact in the lives of those they serve – to be strategic, to be innovative, and to be excellent; and worked to provide the resources to make that possible. We know there are and will be obstacles and change, but we will meet them together with resilience.

Resilience is often thought of as the ability to weather the storm, to get to that blue sky on the horizon. To recognize opportunity in that storm will take a committed effort, rooted in the trust we all have in one another and in what we do. As we move forward in 2020 and beyond, we will utilize the skills and knowledge we've acquired this year to build our competency and consistency, and explore how we can leverage our resilience and trust as a network of community health centers – strong in our independence and commitment to our communities, and mighty in our collective ability to improve the health and well-being of the most vulnerable among us.

Community health centers have a long and storied history of resilience. The Tennessee Primary Care Association is proud to be a part of that legacy. We look forward to standing strong together as we move forward.

Terri Sabella, RN, JD, CPHQ
Chief Executive Officer

WHAT IS A COMMUNITY HEALTH CENTER?

Since the nation's first health centers opened in 1965, expansion of the federally-supported health center system to more than 1,400 organizations has created **an affordable health care option for more than 28 million people**. Health centers help increase access to crucial primary care by reducing barriers such as cost, lack of insurance, distance, and language for their patients. In doing so, health centers provide substantial benefits to the country and its health care system.

HEALTH CENTERS:

- Provide highly efficient and cost-effective care, generating \$24 billion in savings for the health care system annually.
- Deliver a broad array of primary and preventive care services, including screening, diagnosis, and management of chronic illnesses such as diabetes, asthma, heart and lung disease, depression, cancer, and HIV/AIDS.
- Reduce mortality, health disparities, and risk of low birth weight with the care they deliver.
- Offer numerous enabling services, such as transportation, translation, case management, and health education in order to ensure patients receive the care they need.

In addition, health centers employ more than 236,000 people of all skill and education levels, and create \$54.6 billion in total economic activity each year within America's most underserved communities.

-Source: National Association of Community Health Centers

WHAT DO TENNESSEE COMMUNITY HEALTH CENTER PATIENTS SAY?

"If I call, they'll direct me to whoever I need to speak to. And I'll get my answers quickly."

"Any time I call and need to be seen, if my provider is busy, somebody else sees me. I never have to wait. Every time I come in here, I have a good experience."

"The people in this clinic kept me up and going and able to do what needed to be done. If it hadn't been for them, I wouldn't be here. It would be a crime beyond all magnitude if small communities, small rural areas like where I grew up, if they didn't have facilities like community health centers."

"I've had people call me just to check on me. I mean, for no reason, not even an appointment reminder. Just, 'How's your day?' It's like they seem to go beyond the call of duty."

"Our provider has been one of the best blessings that we have ever had happen to us. He went far above and beyond to make sure that we have what we need and that we know what we need to know."

PROGRAM ACCOMPLISHMENTS AND HIGHLIGHTS

CENTER FOR QUALITY IN COMMUNITY HEALTH

TPCA's Center for Quality in Community Health (CQCH) was awarded once again in 2019 with the Health Center Controlled Network (HCCN) grant through the U.S. Department of Health and Human Services' Health Resources Services Administration (HRSA). The funding began August 1, 2019, and will continue over the next three years. HCCNs are networks of health centers working together to leverage health information technology to improve access to care, enhance quality of care, and achieve cost efficiencies through the redesign of practices to integrate services and optimize patient outcomes.

There are currently 22 health centers participating in the CQCH.

EDUCATION AND TRAINING

The Association offers numerous opportunities for members to learn and share best practices, resources, and strategies. These include workgroups, users groups, meetings, and trainings. In 2019, TPCA held 22 distinct trainings, which were attended by more than 750 participants. In addition, the Annual Conference was attended by 109 health center representatives and 34 exhibitors.

TECHNICAL ASSISTANCE TO HEALTH CENTERS

TPCA offers a wide range of technical assistance and consulting services to community health centers, and services may be provided to any health center staff member. Through November 2019, TPCA staff provided more than 140 episodes of technical assistance in the following areas:

- Center for Quality in Community Health (CQCH)
- Clinical Informatics
- Clinical Services
- Collaborative Learning Opportunities
- Health Care Access
- Health Information Technology and Telehealth
- Leadership Development and Governance
- Operational Excellence
- Policy and Advocacy

HEALTH POLICY

TPCA works to keep our members informed about federal and state policy issues that impact their organizations, and to educate government leaders and others about primary health care in medically underserved communities. Accomplishments in those areas for 2019 included:

- Securing an additional \$2 million in recurring funding for the Health Care Safety Net Fund for Tennessee health centers.
- Actively worked to ensure fair and adequate Medicaid PPS funding for health centers.
- Organized meetings for 23 Tennessee health center advocates with eight Tennessee Members of Congress and both Tennessee Senators in Washington, and facilitated 46 visits with state legislators on TPCA's 2019 Hill Day.
- Coordinated visits to health centers with several Members of Congress and Tennessee state legislators to increase understanding of community needs, CHC services, and the importance of stable funding.
- Passed legislation through the Tennessee House of Representatives to improve access to medication assisted treatment (MAT) for treatment of opioid use disorder in health centers.

Tennessee's community health centers served more than 422,000 patients in 2018, with service delivery sites in 70 (highlighted above) of the state's 95 counties.

This health center site guide profiles all of Tennessee's Federally Qualified Health Centers, with specific information on clinic locations, services offered, and patients served. Health centers are organized based on Tennessee's Three Grand Divisions (West, Middle, and East), then listed alphabetically within each division.

WEST TENNESSEE HEALTH CENTERS

- Christ Community Health Services
- Citizens of Lake County for Health Care
- Gibson County Community Health Center
- Hardeman County Community Health Center
