# TENNESSEE'S HEALTH CENTERS: A BEACON OF HOPE

Each day, Tennessee's community health centers open their doors to deliver high-quality, accessible healthcare to those in need. Despite persistent health disparities and workforce shortages, these centers remain focused on patient well-being and providing essential care with unwavering dedication.

Representing 30 community health centers across the state, the Tennessee Primary Care Association supports their pursuit of healthcare excellence.

We're a strategic partner in ensuring all Tennesseans have access to quality, patient-centric primary care, and, as a strategic partner, we empower our members with shared resources, amplify their interests at the state and federal levels, and foster a collaborative environment through our impactful initiatives.

Over the past year, our members served more than 427,000 Tennesseans through more than 1.6 million visits, covering medical, dental, behavioral health, vision, substance use disorder, and enabling services.

This remarkable impact is made possible by the support of our community, state, and federal partners. We extend our heartfelt gratitude to those who back our mission and enhance the health of our communities.

Explore this publication to learn how each member center contributes to our statewide success.

A handwritten signature in black ink that reads "Libby Thurman".

Libby Thurman  
Chief Executive Officer

# WHAT IS A COMMUNITY HEALTH CENTER?

For more than 50 years, the nation's network of nearly 1,500 community health centers have served as the health care home for more than 32 million patients. Health centers break down barriers to care by serving all patients regardless of their insurance status or ability to pay, providing culturally and linguistically appropriate care, and offering enabling services to address non-medical needs.

Community health centers are consumer-driven and patient-centered organizations that serve as a comprehensive and cost effective primary health care option for America's most underserved communities. Health centers increase access to health care and provide integrated services based on the unique needs of the communities they serve.

---

**There are **four key components** that define health centers and help them serve America's communities.**

1

## **Located in Areas of High Need**

Designated as medically underserved areas or populations by the federal government.

2

## **Comprehensive Set of Services**

Based on community needs, health centers offer medical, dental, vision, behavioral health, and enabling services.

3

## **Open to Everyone**

Regardless of insurance status or ability to pay, and sliding fee scale options are offered to low-income patients.

4

## **Patient-Majority Governing Boards**

At least 51% of every health center's governing board must be made up of patients.

# STATEWIDE IMPACT:

How Tennessee's Community Health Centers  
Make an Impact Across Tennessee

## DID YOU KNOW?

Tennessee's Community Health Centers have seen a  
**15.7% increase in dental patients** since 2020.

# SERVICES PROVIDED IN 2023

**427,947**  
TOTAL PATIENTS\*

**1,648,065**  
PATIENT VISITS

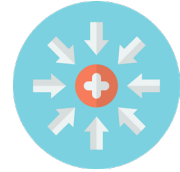

## MEDICAL

Visits: **1,143,119**  
Total Patients: **378,859**

## BEHAVIORAL HEALTH

Total Patients: **35,733**

## SUBSTANCE USE DISORDER

Visits: **24,665**  
Total Patients: **5,959**

## VISION

Visits: **4,961**  
Total Patients: **4,828**

## WHAT ARE ENABLING SERVICES?

Community Health Centers provide enabling services, or non-clinical services that improve patient access to care and quality health outcomes. Enabling services can include health education, improving the health literacy of the newly insured, translation services, transportation, and peer counseling.^

\* Patients can receive multiple services.

■ 23% Children (Under 18 years) ■ 64% Adults (18-64 years) ■ 13% Older Adults (65+)

■ 29% Uninsured ■ 32% Medicaid/CHIP ■ 13% Medicare ■ 26% Other Third-Party

<sup>+</sup> The Federal Poverty Line is a measure of income issued every year by the Department of Health and Human Services (HHS). Federal poverty levels are used to determine eligibility for certain programs and benefits, including savings on Marketplace health insurance, and Medicaid and CHIP coverage. Percentages are calculated based on the number of patients with known income.
